## 普通翠鳥 Common Kingfisher

普通翠鳥的身體顏色鮮艷，有像短劍般的鳥喙，方便捕捉淺水中的魚。普通翠鳥是捕魚高手，因而又名「釣魚郎」。牠很多時會貼近水面處佇立，然後俯衝入水捕魚，是池塘邊或淺水地方的常見雀鳥之一。

Common Kingfisher is a colorful and striking bird and has a long dagger-like bill. The bird is good at catching fish in water so it is called as "King-fisher". It often perches right above water and plunges into water for fishes. It is a common bird found near ponds or in shallow waters.
