# 招潮蟹 FIDDLER CRAB

香港  
濕地公園 Hong Kong  
Wetland Park

### 招潮蟹

常見於后海灣的泥灘上覓食。雄性有一隻特大的螯，牠們在泥灘上揮舞大螯的動作，看來似在招喚潮水的模樣。

### Fiddler crab

Commonly found feeding on the mudflats in Deep Bay. The male has one of its claws greatly enlarged and looks as if it is holding a fiddle.
