老鼠筋 Spiny Bears Breech

老鼠筋的花朵白中帶紫，葉邊有尖銳的鋸齒。果實呈長橢圓形，後面拖著長長的花柱，恰似老鼠的身體和尾巴，因而被稱為「老鼠筋」。老鼠筋生長於鹹淡水的環境，葉上鹽腺體能排出鹽份。

Flowers are purple-white in color and leaves have spiny lobes. The oblong fruits and the long styles left on the fruits after flowering make the Spiny Bears Breech look like a mouse. It grows in brackish environment and salt is excreted through the salt glands on leaf surface.
