

Why are the two poles so cold?

2.1.1 What is the angle of the Earth's axis tilted from perpendicular to the orbital plane?

2.1.2 When the Earth revolves around the Sun along the elliptical orbit, different areas on the Earth receive different coverage of solar radiation. Which areas receive the least solar radiation?

2.1.3 Why are peat swamps and lankes only formed in summer in the North Pole? Are these wetlands?

2.1.4 Why do animals in the frozen north migrate or hibernate in winter?
