

## Clues left by animals

Some things we consider as "undefined object" might be the nests, pellets (regurgitated food), remains of moulting, eggs and even excrement of the animals. All these clues showed that particular animal had used this area as living or feeding ground.

### 4.1.1 Observe the clues left by animals and record their characteristics in the table.

(If the same clues were found in different locations, please write down separately)

<b>Date:</b>				
<b>Site:</b>				
	<b>Places:</b> e.g. tree, ground, waterside, others (please specify)	<b>Picture</b>	<b>Features</b> (e.g. Texture, smell)	<b>Remarks:</b> (e.g. Are there other animals found?)
1				
2				

	<b>Places:</b> e.g. tree, ground, waterside, others (please specify)	<b>Picture</b>	<b>Features</b> (e.g. Texture, smell)	<b>Remarks:</b> (e.g. Are there other animals found?)
<b>3</b>				
<b>4</b>				
<b>5</b>				
<b>6</b>				

**4.1.2 Integrate the information collected by different groups. Find out which kind of animals frequently use the area as shelter and feeding ground.**
